

CLEANING &
CARE

INSTRUCTIONS FOR USE AND CARE

You can help to maintain the original beauty of your covering fabric furniture by treating it carefully and caring for it properly. Please therefore heed the following recommendations:

- › Avoid exposing your brand new upholstered furniture to direct sunlight.
- › Do not position your new upholstered furniture directly in front of heat sources like heater or fireplace.
- › Avoid contact between your upholstered furniture and rough clothing.
- › Remove inevitable dust and minor soiling through gentle vacuuming and using a soft upholstery nozzle.
- › Leave 5- 10 cm wall distance to your new piece of furniture if possible.
- › You should turn loose cushions regularly and place them differently.

We do not assume any warranty for damage caused by improper use, care and pets.

CLEANING INSTRUCTION

Liquids should be absorbed immediately without pressure with a cloth. Stains should be dabbed with distilled water and a cotton cloth in a circular motion from the outside to the inside. Do not use any aggressive cleaning agents that could attack the cover fabric. Test the cleaners on a concealed spot for compatibility. Please note that the use of cleaning agents may invalidate the protective impregnation.

We do not assume any warranty for damage caused by improper cleaning or subsequent impregnation.
