

FEEL COZY EASY CLEAN

Problems with dirt and stains are a thing of the past. Pure softness, redefined. A luxurious chenille with an exceptionally soft hand and a

subtle marbled sheen. Nuanced tones add depth, warmth, and effortless elegance.

Typical product characteristics:

Light colors tend to show staining and denim abrasion faster and more clearly than dark colors. In dark and intense colors, pigment migration may occur. Pilling is unavoidable and can also occur due to the adhesion of foreign fibers. Every flat fabric will develop a nap over time, with patina and shine marks forming. Snags are expected if the fabric is caught on sharp objects. A slight stripe effect may occur due to the material characteristics. In chenille fabric, changes in pile layers (seating marks), shimmering (color shifts under different lighting angles), and flattening of the chenille effect are unavoidable. Minor color and structural deviations between production batches are unavoidable. A certain degree of fading due to exposure to light or abrasion caused by use over time is also inherent in chenille fabric.

Easy to clean with water:

For stain removal you need a white, clean and soft cotton cloth and distilled water. First you wet the stain directly on the upholstery fabric with distilled water. Proceed in the same way with the cotton cloth. Then remove the stain in circular movements and let it dry. Please do not use the cleaned area until completely dry.

CLEANING INSTRUCTIONS

Daily care and at-home cleaners can keep your fabric looking beautiful for years. In the case of a spill, stain, or general wear and tear, follow our tips on how to clean a fabric.

For cleaning you need distilled water and a ph neutral shampoo.

You need a white, clean and soft cotton cloth. Use this to remove the stain in circular motions and allow the area to dry.

Cleaning only with the vacuum cleaner nozzle.

Recommended care labeling:

washing

bleaching

drying

ironing

dry cleaning

Note on Washability

Tests were carried out on samples in accordance with EN ISO 105-C06. Washing was done in a washing machine, without detergent, followed by air drying.

According to the standard:

“From the first wash onwards, color changes of up to grade 2 (grey scale) and size changes of $\pm 3\%$ in length and width (warp/weft) may occur. These values apply for up to five washing cycles.”

Additional washing cycles may further affect the appearance and dimensional stability of the upholstery fabric beyond these ranges.

Finishes (for example Easy-Clean finishes or similar treatments) can be affected by washing processes. The function of such finishes generally applies only to the unwashed condition.

General Note

Tests were carried out on different samples in new, unused, and unwashed condition. The results should therefore be understood as average guideline values and do not guarantee identical values during actual use.

Instructions for use and care:

Please take note of the instructions for use and care at www.eurotex2000.com/Care instructions. We assume no warranty for damage caused by improper use, cleaning, care, subsequent impregnation and pets.

Cleaning instruction:

Important information and useful tips for optimum cleaning and care of your upholstery fabric can be found at www.2-clean.de. Further cleaning will have to be done by professionals who specialize in how to clean with this description.
