	Fastness to rubbing dry EN ISO 105-X12 bright colors dark colors	4-5 4-5	A A
	Fastness to rubbing wet EN ISO 105-X12 bright colors: dark colors:	4-5 4-5	A A
	Fastness to light EN ISO 105-B02-2 bright colors: dark colors:	6 5	A B
	Permissible color tolerance DIN EN 20105-A02	min. grade 4	passed

Typical product characteristics:

Light colors show staining and denim abrasion faster and more clearly than dark colors. In combination with dark or intense shades, color migration/color transfer may occur. Dark and intense colors tend to show color abrasion. Pilling is unavoidable and can also occur due to the adhesion of foreign fibers. A slight stripe effect may occur due to the material characteristics. Minor color and structural deviations between production batches are unavoidable and may occur. A certain degree of fading due to exposure to light or abrasion is inherent to the nature of the fabric. Every velour fabric will flatten with use, making changes in pile layers and seating marks unavoidable. Shimmering/color shifts depending on light incidence are characteristic of velour. Velour fabrics are sensitive to scratches and pressure, which may lead to pile loss.

CLEANING INSTRUCTIONS

Daily care and at-home cleaners can keep your fabric looking beautiful for years. In the case of a spill, stain, or general wear and tear, follow our tips on how to clean a fabric.

For cleaning you need distilled water and a ph neutral shampoo.

You need a white, clean and soft cotton cloth. Use this to remove the stain in circular motions and allow the area to dry.

Cleaning only with the vacuum cleaner nozzle.

Recommended care labeling:

washing

bleaching

drying

ironing

dry cleaning

Note on Washability

Tests were carried out on samples in accordance with EN ISO 105-C06. Washing was done in a washing machine, without detergent, followed by air drying.

According to the standard:

“From the first wash onwards, color changes of up to grade 2 (grey scale) and size changes of $\pm 3\%$ in length and width (warp/weft) may occur. These values apply for up to five washing cycles.”

Additional washing cycles may further affect the appearance and dimensional stability of the upholstery fabric beyond these ranges.

Finishes (for example Easy-Clean finishes or similar treatments) can be affected by washing processes. The function of such finishes generally applies only to the unwashed condition.

General Note

Tests were carried out on different samples in new, unused, and unwashed condition. The results should therefore be understood as average guideline values and do not guarantee identical values during actual use.

Instructions for use and care:

Please take note of the instructions for use and care at www.eurotex2000.com/Care instructions. We assume no warranty for damage caused by improper use, cleaning, care, subsequent impregnation and pets.

Cleaning instruction:

Important information and useful tips for optimum cleaning and care of your upholstery fabric can be found at www.2-clean.de. Further cleaning will have to be done by professionals who specialize in how to clean with this description.
