Typical product characteristics:

Pigment bleed and color abrasion may occur with dark and intensive colors. Pilling cannot be avoided and may also occur through the adhesion of fibers from other sources. All flat-woven fabrics may roughen in use and patina and glossy spots may occur. Pulled threads are to be expected if sharp objects catch in the fabric. Depending on the material, a slight striped effect may occur. In the case of chenille fabrics a change in the run nap (shading), shimmer (color change depending on the light angle) and the fattening out of the chenille effect are inevitable. Over the course of time, a certain amount of color fading can be expected. This is due to light incidence or abrasion caused by heavy usage of chenille fabrics. Minor variations in color and texture between product lots are unavoidable and may occur.

Easy to clean with water:

For stain removal you need a white, clean and soft cotton cloth and distilled water. First you wet the stain directly on the upholstery fabric with distilled water. Proceed in the same way with the cotton cloth. Then remove the stain in circular movements and let it dry. Please do not use the cleaned area until completely dry.

CLEANING INSTRUCTIONS

Daily care and at-home cleaners can keep your fabric looking beautiful for years. In the case of a spill, stain, or general wear and tear, follow our tips on how to clean a fabric.

For cleaning you need distilled water and a ph neutral shampoo.

You need a white, clean and soft cotton cloth. Use this to remove the stain in circular motions and allow the area to dry.
